Relief that doesn't wait for the next medication trial.

We are a family-owned and operated outpatient psychiatric clinic built around rapid-acting, closely monitored care for treatment-resistant depression, anxiety, PTSD, and other mental health conditions. We partner with you, measure your progress at every visit, and coordinate with your existing doctor. **You are cared for by physicians at every step.**

YOU MAY BE A GOOD FIT IF YOU…

- Have tried two or more antidepressants without lasting relief
- Struggle with side effects from current or past medications
- Live with PTSD or severe anxiety alongside depression
- Feel like you can't wait weeks or months to feel better
- Are facing depression during or after pregnancy
- Feel stuck and want more than another medication change

OUR TREATMENTS

Ketamine Infusion Therapy

OFF-LABEL · IV · MONITORED

Weight-based IV ketamine given under continuous heart and breathing monitoring, with preparation and integration support. A typical starting course is six sessions over two to three weeks.

35,000+ infusions since 2014

Transcranial Magnetic Stimulation

FDA-CLEARED · NON-SYSTEMIC

No sedation, no medication in your system, and no driver needed. Delivered by certified staff over a standard 36-session course.

Covered by most health plans

Spravato

FDA-APPROVED · ESKETAMINE

FDA-approved esketamine nasal spray, taken in our office during a two-hour monitored visit. Provided through a certified program for treatment-resistant depression.

Covered by most health plans

Holistic Psychiatry

IN PERSON OR TELEHEALTH

60-minute intakes and 30-minute follow-ups with psychiatrists and nurse practitioners, plus supportive therapy and lifestyle guidance when helpful.

5,000+ sessions delivered

HOW WE CARE FOR YOU

We coordinate with your doctor. We work alongside your existing providers and keep them informed throughout your care.

We measure your progress. Validated mood assessments at every visit, so you can see your response over time.

A real clinician answers. Reach our medical staff directly — never a call center.

Same-week evaluations. Urgent needs are triaged the day you reach out.

GETTING STARTED IS SIMPLE

1. **Book a free consultation.** Scan the code or call — no referral needed.
2. **Get a personalized plan.** We review your history and recommend the right treatment for you.
3. **Begin care.** Start treatment with monitoring at every visit.
4. **We stay in touch.** We keep your existing doctor informed every step of the way.

Not sure if KCLA is right for you? Book a free consultation and our team will help you understand your options – no referral needed, no obligation.

SCAN TO BOOK

Real progress, measured every step of the way.

We use validated clinical assessments to track your progress throughout treatment. You'll see objective results — including PHQ-9 trend graphs — so you and your doctor can clearly follow your response over time.

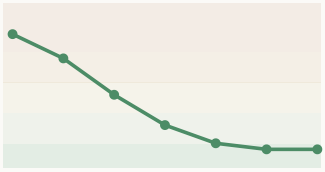
83%	70–80%	35,000+	12 yrs
Response rate, ketamine infusion	Response rate, TMS	Infusions delivered since 2014	Continuous operation, original founder team and medical leadership

Response defined as a reduction of at least 50% from baseline mood assessment score by the end of the initial series.

Minimal 0–4 · Mild 5–9 · Moderate 10–14 · Mod. severe 15–19 · Severe 20–27 · Assessment

PATIENT A

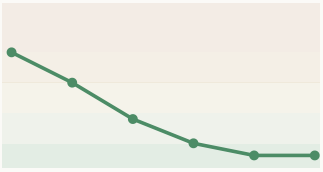
Major depressive disorder, suicidal ideation, generalized anxiety



Baseline PHQ-9 of 22 reached the minimal range within four weeks and held there across twelve months of maintenance.

PATIENT B

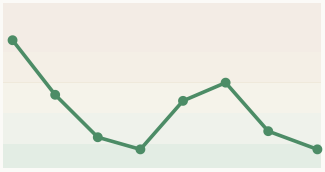
Major depressive disorder, history of postpartum depression



Remission from a single initial series, sustained more than nine months with no further infusions.

PATIENT C

Treatment-resistant depression with PTSD



A relapsing course managed with planned repeat series; each booster returned the patient toward remission.

SAFETY & OVERSIGHT

- Continuous vitals every infusion: HR, SpO2, BP, ECG
- Protocols designed and supervised by a board-certified anesthesiologist and psychiatrists
- Staff certified in ACLS, BLS and ASA moderate sedation
- First and only ketamine clinic to earn Quad A accreditation, recognizing our commitment to patient safety and quality.

LEADERSHIP

Steven L. Mandel, MD: Co-Founder & President. Board-certified anesthesiologist, 40+ years of clinical ketamine expertise. MD, USC Keck; residency at Mass General and UCLA. Founding physician and first president of ASKP3.

Sam Mandel: Co-Founder & CEO. Patient-centric, innovative operator.

Care team of psychiatrists, PMHNPs and RNs.
